Press Release

Defiant Electric Roadster at the Knoxville News Sentinel Auto Show

~ Ecology ~ Economy ~ Excitement ~

Russellville, Tennessee February 19, 2016: [Shockwave Motors, Inc.](http://ShockwaveMotors.com)

Shockwave Motors announced the Defiant EV³ Roadster © has been invited to be shown at the upcoming [Knoxville News Sentinel Auto Show](#) on February 26th to 28th, at the Knoxville Convention Center. The electric roadster will be part of the Knoxville Electric Vehicle Association's Display. John McMillian, CEO, said, *"We've been associated with the Knoxville Electric Vehicle Association for many years and we are pleased to be a part of the electric vehicle display this year."*

Shockwave Motors has designed an affordable, all electric roadster, with the commuter in mind. The pollution free roadster has a range of up to 200 miles per day and is designed to be fully recharged from a standard 120-volt outlet while the commuter is at home or at work. No special chargers or infrastructure needed. This is what sets the roadster apart; no other electric vehicle, with our level of performance, can get a full recharge in about 9 hours from a standard 120-volt outlet. Level II charging is an option and the roadster recharges in about half the time of a Nissan Leaf. The Defiant EV³ Roadster © seats three and has a top speed of 70+ MPH.

The Defiant EV³ Roadster © was seen on a recent episode of the Science Channel's All-American Makers. Brian Roe commented, "An all-electric car that can hit 70 miles per hour and be recharged from an ordinary wall outlet, that could revolutionize compact electric vehicles..."

Brook, Brian, and John ready for a test drive
